Per annum volume distribution in some Russian chronicles

1. VOLUME FUNCTION FOR *DVINSKOY LETOPISETS* (The complete version of the chronicle)

Volumes calculated as per edition of *The Complete Russian Chronicles*, Volume 33, Leningrad, 1977. For every year described in the chronicle, the volume of the relevant text fragment (in lines) is indicated. For instance, entry 1342-7 means that the volume of the fragment related to 1342 equals 7, etc.

For certain years, there are two volume values and not one. This means that the commentators of this chronicle distinguish between the principal ancient text and later inserts and addenda. Therefore, in order to obtain a complete picture of the evolution of a certain text, we calculated the volume of the principal fragment separately, as well as the volume of the same fragment including addenda. We only provide values of volumes *other than zero*. If a certain year is not described in a chronicle, we omit this year in our table.

1342 – 7;	1397 – 5;	1398 – 13;	1417 – 6;	1431 – 2;	1464 – 19;	1491 – 5;
1499 – 4;	1511 – 19;	1530 – 3;	1534 – 2;	1541 – 2;	1543 – 2;	1546 – 25;
1547 – 1;	1549 – 3;	1550 – 2;	1553 – 17;	1555 – 19;	1556 – 4;	1557 – 2;
